C THE CURRICULUM

The master's in pharmaceutical sciences is coordinated and supported by the Pierre Fabre Foundation to train high-level specialists in the medical drug sciences field in the three countries of Southeast Asia. It receives support from the Francophone University Agency and French Cooperation.

UPGRADE YEAR

Joint education for all students (15 teaching units). Taken at the University of Health Sciences in Cambodia (2016–2017) and the University of Health Sciences in Laos (2017–2018). Its purpose is to reinforce and harmonize the general skills of the students in the field of medical drugs. Approaches to chemistry (pharmacochemistry) and biology (pharmacology), as well as general knowledge, are worked into this training segment. Direct integration into one of the Master Mekong Pharma majors is possible after taking a Master's 2 entrance examination sponsored by those in charge of the French master's degree.

MASTER 2

3 to 4 months of theory lessons and hands-on courses + 6 months of internship validated by a thesis.

MAJOR 1: QUALITY OF MEDICATION

Diploma issued by the Paris Descartes University. Courses delivered in Vietnam at the Hanoi University of Pharmacy. The training puts students in line to get their Master's 2 degree in medical drug sciences, specializing in "quality of healthcare products."

MAJOR 2: CLINICAL PHARMACOLOGY

Diploma issued by the Toulouse III Paul Sabatier University. Courses delivered in Vientiane, at the University of Health Sciences of Laos. The training puts students in line to get their Master's 2 degree in health biology, "pharmacological innovation and medical drug positions" program.

MAJOR 3: PHARMACEUTICAL DEVELOPMENT OF NANOMEDICINES

Diploma issued by the University of Angers. Courses delivered at the Ho Chi Minh City Medicine and Pharmacy University. The training puts students in line to get the Master's 2 degree in medical drug sciences, specializing in "innovation and transfer," nanomedicines program.

M THE MASTER MEKONG PHARMA

is a two-year term of postgraduate education, delivered in Southeast Asia, taught in the French language by professors from French universities. It opens the way for professionals to work in various agencies, including control laboratories, medical drug agencies, central government branches, hospitals, research laboratories, universities, pharmaceutical and agrifood industries, ...

Its main target: Pharmacists holding degrees from the universities of Cambodia, Laos, and Vietnam. It leads them to the French Master's 2 degree, which enjoys international recognition. That training is an opportunity for participants to integrate a sound, world-class network of medical drug specialists.

Students enrolled in the upgrade year or for the Master's 2 program receive a scholarship provided with the support of the Pierre Fabre Foundation, French Cooperation, and the Francophone University Agency (AUF).

ENROLLMENT

Procedure and fees

For the upgrade year, the four universities in Southeast Asia are in charge of the preselection of students who obtained their degree in their home country.

The postgraduate training segments under the Master Mekong Pharma program are open to all degree-holding pharmacists. Professionals (pharmacists, doctors, biologists, and chemists) who would like to broaden their knowledge in the field of medical drugs may enroll for certain educational courses.

The contributions to the university registration fees are 100 USD for the upgrade year and 400 USD for the Master's 2.
